Projects

CANTEEN ORDERING SYSTEM

Built a responsive web application using HTML, CSS, JavaScript, and Bootstrap for seamless online food ordering. Integrated user authentication (login/registration) and a dynamic product catalog for real-time browsing. Designed an intuitive ordering interface to simplify purchases. Currently developing the backend with Java Spring Boot and MySQL for secure data handling, transaction management, and efficient order processing.

Crack The Code – Logic Puzzle Game

Developed an interactive 3-digit code-breaking game using JavaScript and Bootstrap 4. Features randomized hint generation, modal-based feedback, and a fully responsive UI. Encourages logical reasoning and pattern recognition through dynamic hint cards.

Book Exchange System – Full Stack Web Application

Just built a Book Exchange System 📖 – a full-stack web app for borrowing/lending books with secure user authentication, dashboard, and dynamic book listings. Built using Spring Boot, MySQL, and React.
